□□□□□□□ **Booming business at LIQUI MOLY.** The German oil and additive specialist in March reported the highest monthly sales in its company history: 49.2 m euros. "We have achieved an outstanding start to 2017," says Ernst Prost, Managing Partner of LIQUI MOLY.

The last record-breaking month was not long ago. It was only last November that LIQUI MOLY achieved the previous record amount with 45.5 m euros. This March has exceeded the old record by 8 percent. This positive trend is pervading the entire quarter.

With 126.1 m euros sales and a growth of 11 percent compared to the first three months of last year, it was the most successful first quarter ever. LIQUI MOLY has been on a growth

trajectory for many years. Sales have more than doubled since 2009. But this is not a matter of course for Ernst Prost: "Success is not a sure-fire success, but has to be worked hard for every day. To rest on our laurels now would be the worst thing we could do.
